

## Join the 3volution and Celebrate Free Fire's 3rd Anniversary

*You say you want an evolution? Well, you know – we all want to change the world*

**SINGAPORE, August 20, 2020** – Free Fire, the world's most popular battle royale game on mobile, is kicking off its third anniversary with an exciting 3volution event that showcases how it has evolved, improved, and progressed over the years via a special Time Tunnel interface. The event features the Bermuda Remastered map with new accessible zones, the launch of a new awakened character: Hayato "Firebrand", an **August 22** peak day that will reward Survivors with a free character, and much, much more!

### **Free Fire's Time Tunnel interface will sit at the heart of the 3volution event**

Free Fire's Time Tunnel interface allows Survivors the chance to claim rewards and reach milestones through Time Tokens. Time Tokens are earned by taking part in exploration missions that highlight Free Fire's storyline seen from the perspective of its wide variety of characters. Exploration missions also reward Survivors with tons of character fragments for Hayato and others. Those who prefer to try their luck with the time capsule can use Blue Chip Tokens, which can be converted from Time Tokens, to spin the capsule for a chance to earn exclusive prizes. Prizes run the gamut from five of Free Fire's biggest events over the past year, including the Rapper Throttle motorbike skin and the Maniac Sidekick backpack skin.

### **Enjoy Clash Squad Battles across the four new playable zones on the Bermuda Remastered map**

Starting on August 13, Survivors can join Clash Squad battles on the Bermuda Remastered map across two playable zones: Aden's Creek and Academy. Then on August 19, an additional Nurek Dam zone will open for those who reach the 2nd anniversary node in the Time Tunnel Milestone. On August 22, the final Samurai's Garden zone will become available for Survivors who reach the 3rd anniversary node.

## **Claim the awakened and improved Hayato – Hayato “Firebrand” – for free on peak day**

The 3volution update has caused something to awaken in Hayato; beginning August 19, Hayato “Firebrand” will be available for Survivors to unlock. The awakened Hayato possesses the Art of Blades ability which reduces frontal damage by {40/45/50/55/60}% for 6 seconds, although firing his weapon will cause it to interrupt. On Free Fire’s **August 22** peak day, Hayato “Firebrand” will be free to all Survivors.

The **August 22** peak day will give Survivors even more options for fun and rewards including all game modes unlocked – including Big-Head, Explosive Jump, Cold Steel, Nighthunter, Rampage, and more – the Cube Fragment Aftermatch Drop, and a Friend Callback event.

After an awesome third year, Free Fire invites Survivors to celebrate how far the game has come in the following video.
